

TRAFFIC CALL

Newsletter of the Ben White Memorial Nets
Hit and bounce CW Traffic Net ~ Hit and Bounce Slow Net

DECEMBER 2000

Happy Holidays and best wishes in the New Year.

In this season of good cheer, you might want to send an extra special note of cheer to Lee, W8RTN and Gail, K2BCL. For those who missed the QNC from K8LJG on November 27, it is as follows:

LEE W8RTN IN HOSPITAL FROM APPARENT STROKE X RECOVERING NICELY X AT THIS TIME APPEARS LIKE FULL RECOVERY.

Gail also suffered a stroke, and is recuperating. He has relocated and has no antenna at present. Best wishes to Lee and Gail.

HBN Manager's Comments Sis WD8DIN

Our QNI and traffic count is up from last month. Forty-five different stations checked in bringing a total QNI of 491, listing 461 QTC and clearing 447 in 30 sessions, with an average of 28.44 minutes per session. Fine job. Let's hope the numbers keep climbing into the new year.

Top traffic stations in November are AA8PI, 128; KA8WNO, 77; K8LJG, 72; W8RTN 21; N4ABM, 18; AA4AT, 16; AB4E, 15; WA3UNX, 14; WX4H, 12; K8KV, 12; and W2WSS, 11. The rest of you arfers are not forgotten- your presence is welcomed. It makes it all work smoothly. Thanks to every one.

4RN NTSD stations and sometimes picks up traffic for other regions if there is a regular check-in on HBN. If there is no one available from the region on HBN, he can qsp 1, 2, 4, 8RN and ECN directly to the regional digital station. In a pinch he will take traffic for anywhere and distribute it to the nearest possible digital station. **This is NOT a packet network, but a pactor, NTS dedicated network which handles NTS messages in good order.**

George is back! N1DHT, is back with us after a long absence, and it is great to hear that superb fist. As Jack, KA8WNO, said, "it's like having family back.."

Until next year, 73, ARF. Sis

HBSN Manager's Comments

C. M. (Sam) Shearer, WB5ZJN

HBSN logged 300 QNI's with a QTC of 55. Stations with top honors for net attendance go to NR9K with a perfect attendance. Also high on this month's attendance record were K2YAI, WA3DUH with 29 and KG2HA, VE3DTR, N3ON, and WB5ZJN with 20 or more QNI's. Everyone is appreciated and every check in contributes to the quality and strength of the net. Thanks to all!

Net Frequency: The net frequency is 3.7145 MHz plus or minus. We should all be reminded that the net frequency is not an exact frequency – it is a “plus or minus” – a general area not a specific spot. If the NCS is at 3.7148 MHz, we should tune to that frequency. If you have a radio that has frequency “memory,” and it is set for 3.7145 MHz, be aware that you should “tweak” your rig to zero beat the NCS's frequency. Also, check that your RIT is set at zero and, if you are NCS, turn off your narrow band-width filters.

The alignment of radios varies with each rig. Not all “3.7145 MHz” are the same in all rigs, and as radios get older, and components begin to deteriorate, the rig's accuracy will change. If your 3.7145 MHz was accurate in 1990 it may not be in 2000. (In fact, it might not have been accurate in 1990.) We are all aware of how the venerable “glow-in-the-dark” rigs use to drift considerably when they were warming up, but we should also be aware that today's radios also drift slightly when first turned on. If an NCS does not give his rig adequate warm-up time, he may drift slightly during the net. If this happens, stay with his frequency.

Therefore, the “rule” is this: *The net frequency is the frequency on which the NCS's operates.*

Pre-Net Tuning: I would like to suggest that we not tune up on the net frequency. We should be aware that there may be some lonely sole out there dying to have a QSO with someone, and, if he hears someone tuning his rig, he may be ready to bounce on the net frequency and call CQ. If this happens, we do not have the right to tell him that he has to leave the frequency. Who ever is on 3.7145 MHz at 7:30 a.m. EST, has the right to that frequency. The net has to change. (The general “rule,” in such cases is to go to a slightly higher frequency.) However, this problem can be avoided if we do not tune on the net frequency.

Pre-Net QSO's: Yes, by all means don't hesitate to engage in QSO's with net members before the net. This helps to build camaraderie. If you wish to have a QSO with a station, after tuning up (off frequency), call that station as you would for any contact. If you engage in a QSO with a non-net member, explain early in the QSO that you are waiting for the net to begin and invite him/her to attend. It goes without saying that we should be very conscious of the time. Do not let your QSO encroach on the net's starting time.

Pre-Net Games: Gentlemen, please understand that I do not want to offend anyone, but my responsibility as net manager is to assist in maintaining a high level of professionalism and efficiency. Therefore, I need to respectfully insist that we stop playing the “dits and dahs” games before the net. This is unprofessional, and those hearing this are reminded of the CB'ers antics often heard on local two-meter FM repeaters. We don't need this.

NCS's Absence: If, in those rare instances, when an NCS does not show, the net manager (Sam, WB5ZJN) or the assistant net manager (Chuck, N3ON) will call the station assigned to be NCS in order to establish that he is not there. Once it is established that the NCS is absent, a QNC will be sent by one of the managers asking if someone would like to QNG (take over as NCS). In the even rarer instances when both the managers are absent, the general rule is wait until at least 7:32 a.m., send HBSN? DE <your call>. If you hear no response, step forward and call up the net. There is one important problem with this procedure, and we must be sensitive and alert to this fact: If you are on the fringes of reception, it is possible that the NCS will be calling the net and you may not hear it. If this is the case, when you send HBSN? DE <your call> someone will come back to you and ask you to stand by.

Happy holidays. May the joy and beauty of this special season find you in good health and fill your heart with thankfulness. Merry Christmas, Happy Hanukkah, and Happy New Year!

DEADLINE for news via USPS: 25TH of each month.

Eerie Experience -Ole N4ABM

"To me operating my station in a net is a eerie kind of experience each time I do it. My father was a Navy radioman during World War I. He told me little about

his experiences but I know he operated spark transmitters, that he used crystal detectors, tuning coils, rotary spark gaps and that he wound loading coils to get his rig to load up on a short ships aerial. He said he once heard voice being transmitted by a land station and that the last receiver he used had a vacuum tube diode in it. But he never told me what he sent and received during his tours of duty. I know that one time he was stationed at Sandy Hook, NJ and operated at one of several direction finding stations that helped guide ships into the harbors in foggy weather. These stations operated in a net that developed the ships position as they moved down the channel. He also told me that he once flew on a Curtis seaplane from Washington DC to Norfolk as radio operator and that must have been nearly a first. Anyway, sometimes when I am sitting here listening to 7042 before and after the HBN or when I am operating as NCS or handling someone's traffic I get the funny feeling that my Dad is watching over my shoulders and keeping me on the ball. I wonder if any other ARFers have similar things to report."

Hints and Tips:

Occasionally a station lists traffic on HBN or another net as "common text" or "book of..." . Listing traffic this way is all right for phone nets such as 8rn where most traffic listed is passed on the net frequency. Traffic on CW nets should never, or very seldom, be listed as common text or book. Let's say KK3F has a book of five messages; two for FL one for IN and one for PA. He should check in and list his traffic as FL2 IN2 and PA1. Using the "common text" method just wastes time and often confuses NCS, thereby wasting more time.

-Arfy Woofingham

NJ4L AWARD: In July, a certificate was issued to AB4E and a donation to the American Heart Association was made in his name.

NEW ADDRESS: Cid, W3QQ, 49 Shields Lane, Newark, DE 19702

The following poem was written by a marine stationed in Okinawa, Japan. His request is that this poem be shared with as many people as possible to honor the U.S. service men and women, living and dead, who sacrificed themselves so that we are able to celebrate these festivities. (I received this from Jack, KA8WNO)

'Twas the night before Christmas, he lived all alone,
In a one bedroom house made of plaster and stone.
I had come down the chimney with presents to give,
And to see just who in this home did live.

I looked all about, a strange sight I did see,
 No tinsel, no presents, not even a tree.
 No stocking by mantle, just boots filled with sand,
 On the wall hung pictures of far distant lands.
 With medals and badges, awards of all kinds,
 A sober thought came through my mind.
 For this house was different, it was dark and dreary,
 I found the home of a soldier, once I could see clearly.
 The soldier lay sleeping, silent, alone,
 Curled up on the floor in this one bedroom home.
 The face was so gentle, the room in such disorder,
 Not how I pictured a United States soldier.
 Was this the hero of whom I'd just read?
 Curled up on a poncho, the floor for a bed?
 I realized the families that I saw this night,
 Owed their lives to these soldiers who were willing to
 fight.
 Soon round the world, the children would play,
 And grownups would celebrate a bright Christmas day.
 They all enjoyed freedom each month of the year,
 Because of the soldiers, like the one lying here.
 I couldn't help wonder how many lay alone,
 On a cold Christmas Eve in a land far from home.
 The very thought brought a tear to my eye,
 I dropped to my knees and started to cry.
 The soldier awakened and I heard a rough voice,
 "Santa, don't cry, this life is my choice."
 I fight for freedom, I don't ask for more,
 My life is my god, my country, my corps."
 The soldier rolled over and drifted to sleep,
 I couldn't control it, I continued to weep.
 I kept watch for hours, so silent and still
 And we both shivered from the cold night's chill.
 I didn't want to leave on that cold, dark, night,
 This guardian of honor so willing to fight.
 Then the soldier rolled over, with a voice soft and pure,
 Whispered, "Carry on Santa, it's Christmas day, all is
 secure."
 One look at my watch, and I knew he was right.
 "Merry Christmas my friend, and to all a good night."[]
