Happy Holidays!

No. 253

Newsletter of the Ben White Memorial Nets ~ founded 1938

Happy Holidays! Enjoy the season.

73, ARF! -Sis

HIT AND BOUNCE SLOW NET
MANAGER'S COMMENTS

C.M. (SAM) Shearer, WB5ZJN, Mgr.

Charles (Chuck) Punzell, N3ON, Asst. Mgr

The Larry Frazer, W4SUS Award Committee has chosen, John, K3NNI as the next recipient. John has been a long time member of The Hit and Bounce net. He always brings a high level of operating skill and knowledge to the net. His CW sending and receiving are excellent.

Congratulations John, may you use the W4SUS paddle with pride.

Award Committee K8LJG, N3DE and WA3UNX

HBN Manager's Comments

The kennel was buzzing in November. Fifty-five different stations (QNI 677) brought 644 pieces of traffic and cleared 635. Average time per session 39.6 minutes, the longest being 78 minutes. Seems like old times! Congratulations to all arfers and the NCS' for clearing the "traffic jams"! Your dedication and hard work is much appreciated.

Our top hounds for November who listed 10 or more are NG1A 122, K2BCL 84, W8RTN 66, KA8WNO 54, WX4H 40, K8LJG 33, N4ABM 32, AA4AT 23, KB8ZYY 22, K8KV 15, WA4DOX 15, KK3F 14, WD8DHC 13 and KA5NNG 10. Thanks to the above and everyone who helps to make it work.

New stations in November- **KG4OTL, Andrew VA; K3MT, Mike VA and K4WKT, C C in NC.**

Check your stats. I lost my old Works program, and the new one doesn't speak my language. After calculating by using the program and getting three different totals, I went back to the basics and did it manually. Hi.

Survey- HBSN and HBN arfers, please take a few minutes to fill out the form on page 7. Your input is most welcome.

AB4E is on full time oxygen now and nebulizer. He is still making daily trips to the hospital for therapy.

Twenty-eight stations QNI'ed in the month of November, and 155 pieces of traffic were passed. Perfect attendance goes to our former net manager Harry, W3KOD. Close on his heels were Ad, NR9K (29); Gail, K2BCL and Chuck, KX8B (28); Jim, WA3DUH (27); Chuck, N3ON, Cid, W3QQ, and Sam, WB5ZJN (26); John, VE3DTR (24); Carter, N3AO (23); Sam, KG2HA (22); Bill, W2MTA (21); and Fred, NG1A (20). As always, if you were able to check in only once, your participation is greatly appreciated. HBSN would not exist without everyone's participation. Thank you for your continued support.

Anyone Read This Stuff (III)? Well, yes, at least I know of eight people who do. Thanks guys for your feedback. Don't get me wrong, I am not asking this question for an "at-a-boy." I really do want to know. Unless you have been a newsletter editor, you have no idea how much work goes into putting even a simple letter together, and it is nice to know that someone is reading your material. Sis, our newsletter editor, spends hours collating and writing material for the *Traffic Call*, and a little feedback from us makes it a little easier for her to crank up the computer and start pounding keys for the next issue. Send her information, even if it is just a simple one-sentence note.

Members Profile: In her last newsletter, Sis indicated that she is going to resume the member's profile. Now, please fill it out and send it to her – you, too HBSN ARF'ers! These make most interesting reading. The form is easy to fill out, and you don't have to compose an article. Just answer some simple questions. (It is a lot easier than filling out your federal census report!)

Where's Don? Don, N3COR, has not left us. He has been experiencing rig problems and will be away from the net for a while. Hope all is well, Don, and, remember, if your rig doesn't work, the first thing to check is to make sure it is plugged into the wall. HI!

Sam's Antenna: Well, sorry, but I still haven't gotten out to fix my G5RV. Yes, yes, I can just hear you now. You are saying, "Promises, promises, promises." I

planned to do it over the Thanksgiving holidays, but with family in on Thursday and Friday, an extended dress rehearsal on Saturday with the Canton Symphony for our holiday concerts which were on Sunday, December 1, I just didn't have time. Then it snowed, then it really got cold (8 degrees this morning), then my string of end-of –the-semester final rehearsals and concerts starting hitting me. (Whine, whine, whine...) Anyway, it will get fixed. What did you say? "Yea, right!"?

Seasons' Greetings: I hope that you all have a wonderful holiday, and that the blessings that surround this season are poured down upon you and your loved ones. May I suggest that we all stop for a moment and really listen to the "music" in our life. Reflect on what you have and not on what you don't have. Remember those that are unfortunate and minister to them in some way. Even a simple smile is often enough.

Give thanks...

for living in this country and pray for those who live in fear and oppression.

for the freedom to worship as you please and pray for those who are forced to believe only as their government dictates.

for the freedom to express our views and remember that there are those who are put to death by only saying they do not agree with their leaders.

This is great country where freedom is guaranteed, human dignity is respected, and, although we're still a "work in progress," we are a nation of great people working (sometimes struggling) toward perfection. Perhaps we have not arrived, but we are on the way, and the quality of that journey is what we now enjoy. *...et in terra pax hominibus bone voluntatis.*

Arfer news: Andy, **N9KHD**, is dropping out of traffic nets due to failing vision. He says he's not giving up CW, just traffic handling. Maybe we can catch him somewhere on the bands for a ragchew. I'm sure I speak for all of us when I say we will miss him on HBN.

Will, **K4IWW** was without power for 30 hours during the ice storm, but it was restored on Friday the 6th. As of that date, he still had no telephone service. Hope all is back to normal soon.

NCS reminder- Earle, **W3JKX**, had a problem working 14 MHz, but it has been corrected.

Bob, **K3RC** will not be able to QNI many mornings for a few months. He is starting an interim parish to which it is a fifty mile drive.

YOU BET YOUR BIPPY, AND OTHER THINGS

Mark, W2EAG

Hello everyone, I have not responded to Traffic Call in a long time. Last months, (Nov) issue prompted me to do so.

Our good friend Sam, **WB5ZJN**, wants to know who reads this stuff? Well Sam, I want you to know that I have felt that way before too. As most of you know, I used to do a lot of writing for TC, and the responses were few and far between, not counting our dear Ed. Or should I say our Most Hon. Ed.

Do I read your stuff? The answer is, **YOU BET YOUR BIPPY I DO**, cover to cover. All the contributors to these pages do a great job and all of the material is good reading.

Now I would like to respond to several different things in the last issue.

1. **Bringing traffic.** We have several new members in the kennels who may, or may not be "old timers" in traffic nets. The question of bringing traffic into HBN or HBSN was a good one, and Sam's answer was right on the money. Any way that any station can bring traffic into any traffic net is encouraged, as it is the bloodstream of what we do. We may not be handling as much traffic these days as say, back in 1975 or so, but, that means that we need to originate more and bring them to our nets. So keep them coming, and help grease our wheels.
2. **QRL, Is the Frequency in Use?** Great stuff Joe, and good reading. My thoughts on this subject are that we, (Amateurs) are experiencing a new breed in Amateur Radio today who may be less educated in protocol, plus the fact that many of them do not even know how the radios today are set up, thus they tune up half a Hz below the net, or wherever, and don't know they are interfering. This is just one example. How to overcome it, I don't know.
3. **Scratchi.** This was real fun reading Bill. But, one thang botherin me bout it. Don't those boyz up there on planut Joopiter knowin, ifn they uze zoolu time, they goona get dem messages anihow.
4. I really enjoyed **Dale's Bio.** Being an ex Navy Radioman, I surely can relate to his different billets etc. Good going Dale, you did a great job.
5. **Mike, keep the nostalgia coming** with your interesting articles of the old days of Morse etc. I read them with enthusiasm.

That's it from my desk for now. I would like to extend the warmest wishes for a Happy Holiday Season to all from Sandy and I. May God Bless all of you.

73 and ARF. Mark, W2EAG

Random Recollections..... Part 2

- Bill de W2MTA

WINJM had been recovering from some surgery and then subsequent fall at his home...now recovering in a rehab. facility. Thanks to all who sent him a get well QSL card.

Here's Part 2 of his Random Recollections being published, starting in this year's QCWA Journal.

RANDOM RECOLLECTIONS OF AN OLD HAM

A journalistic history of the life and times in Amateur Radio of George Hart, by George Hart WINJM

Bunch, with Uncle Martin's advice and assistance, ran an electric line up to his attic room and from there proceeded to run extensions all over the room and down the stairs. There was no BX cable, much less Romex, in those days. The line from the laboratory to Martin's room was two separate wires, and from this room to Bunch's attic room ran in channels carved in wood strapping along the baseboard and up the stairs.

When the installation was complete, Bunch proceeded to erect a control panel on the wall alongside his big iron bed and lines back down the stairs to the first three steps. These attached to homemade switches made from Meccano parts, one switch on each step. Then he placed a board over each switch so that anyone stepping on it would close the switch. The wiring was configured so that anyone mounting the steps would cause lights to light on the switchboard, thus notifying him that someone was coming up.

He planned to add another switch on his board which would give the approaching person a jolt of electricity if he continued up the stairs without permission, but found that the standard house voltage was not high enough to penetrate normal shoes. So he obtained a standard lead acid storage battery and a tungsten charger and used a spark coil to supply the necessary voltage. He laid copper screening across the first three steps so that pressure would set off the spark coil with a voltage high enough to penetrate even rubber-soled shoes.

This had the desired effect and gave Bunch considerable glee when an intruder (usually one of his three brothers, but visiting teenagers as well) was subjected to the startling shock. I suspect Bunch had a sadistic side to his nature.

As time went on, Bunch added refinements to his setup. He set up three lights at the top of the steps: a white one and a red one. When someone wishing to enter his domain stepped on the first step, a light would go on on Bunch's switchboard, but nothing would show at the top of the steps. The second step would show either a white light or a red one, depending on how

Bunch had it set up. If a white light. It meant OK to come up. A red light meant keep out. If a red light showed and the person stepped on the third step, he would receive a sharp jolt from the spark coil. Bunch could have it set up so it operated automatically, or he could operate it manually.

The former was intended to forbid entry even if Bunch was not in his room. But the system had an outstanding flaw. One could easily outwit the system by avoiding that third step and continue up the steps whether the light showed white or red. Bunch eliminated this by putting metal screening over all the steps and wiring the spark coil to all of them, plus to the metal door-knob so that the spark coil would activate when the doorknob was turned or could be activated manually to shock anyone on any of the steps.

It was wickedly ingenious. He also wired his bed so that he could shock anyone leaning on it (but the high voltage would not penetrate the mattress) and various chairs and other items of furniture in the room. Throughout his teens he exercised complete domination of his attic room. Our father who was quite elderly, hardly ever ventured up the steep stairs. On only one occasion can I remember a visit by him to Bunch's third floor domain, subject to be covered later.

To be continued in part 3.

Another joy from Scratchi, from CQ Magazine February 1959 issue- de Bill W2MTA

Feenix, Ariz.

Deer Hon. Ed: The Hon. Ruckus are dying down, and things are getting back to normal here, but things been reel harey here while it lasting. Even Hon. Ant Fuji now getting big horselaff out of hole thing, altho it not so funny when it happening. It just goes to showing how little things like pushing plate switch to going on air can reely starting things off in 1/c stile.

It all starting when, cupple weeks ago, I walking in shack, pushing magazines off chair, sitting down, grabbing Hon. MIke, and calling seek-you just like always. Standing by, and amchoor from back east coming back to me say- ing: "Old buddy, ur on the Clam, Lobster and Fish Net freakwency. How many messages you having, and where they going?" Hon. Ed., you could nocking me over with a ten-thousand megacycle half-wave antenna, on acct. I not planning to sending any messages. I telling him so, and he saying I gotta send message, and I saying no wanting sending message, but after cupple more argewments I desiding I mite as well sending message to Hon. Ant Fuji, who alreddy back east and not heering from me for some time. So, giving him message: Deer Hon. Ant Fuji -- Hope you having fine time in fifty-nine -- no resolushuns broken here -- love Scratchi. (*cont. pg 4*)

You not thinking that pretty good message to thinking up on spur of moment, Hon. Ed.? I thinking so to. Other guy not thinking same likewise as us. No indeedy. Back he coming: "Ole boy, observe net regs; gimme proper serial number; Ant Fuji's real name; Ant Fuji's address; etc. etc." Making me little mad. I going back and telling him to forgetting hole idea, on acct. I not knowing Ant Fuji's favorite flower, and surely he be wanting that next. Back he coming: "No dice, sending message as I are asking for it."

Hon. Ed. he reely are asking for it, but desiding to going ahead anyway.. So, starting over again. "Serial number one; message to Ant Fuji -- A as in Anthony Adverse; N as in Never the Hon. Twain Shall Meet; T as in Hon. Teehouse of August Moon; F as in Forscore and Twenty Yeers Ago; U as in You; J as in Joon in January; I as in I wonder if You Getting all This OK"; then I standing by. Boy are he mad. It are then I knowing he having reel good quality rig, on acct. I can heer his teeth grinding.

He finely calming down, howsumever, telling me if wanting to use funnyetics ok, but using reel kind, which he then proceeding to giving me. Sounding like lineup of Greek football teem, so desiding to giving him message without funnyetics.

He getting message next try, or at least that what he telling me. After this Scratchi are bit on thirsty side, so killing filaments on toobs and going and getting nice long drink cactus jooce to forgettint hole thing. In fackly, not remembering much about it until cupple days later when getting telegram from Ant Fuji, in which she saying "Don't worrying about fire -- stay away from Indians -- I'm on my way to help you in your hour of need." Reeding it over cupple times, but it still not making sense.

Calling Hon. Telegram office, and they reeding it again over fone. Still same message!! I not wondering about it long, Hon. Ed., on acct. that afternoon Hon. Ant Fuji herself in person riding up in taxi-cab. She rushing in and telling me to telling her all about it. When I saying all about what, she reeching in purse and bringing out postcard on which are message she getting via amchoor radio. When I reeding it carefooly I seeing why she so disturbed. Here are what message saying: Deer Ant Fuji -- Hope you helping -- having fire -- nine more revolushuns -- broken hart -- in love -- Scratchi.

I wanting so much to laffing, but knowing if I laffing, Hon. Ant Fuji giving me crack on Hon. Hed, so all can do is try to explaneing what happening. She thinking Indians are setting fire to ranch in big Indian revolushun, but she not figuyouring out how I can being in love with broken hart with all the Indians around.

It not until Hon. Brother Itchi coming home and helping explane that finely Hon. Ant Fuji are

understanding everything. Then she laffing and saying as long as coming out to Feenix she mite as well having long visit. Which are okey with me on acct. Ant Fuji got plenty bux and maybe I can getting new reseever if she staying long enuf.

Howsumever, next time I calling seek-you and getting some Hair Net freakwency, I not sending message. No indeedy.

Respectively yours, Hashafisti Scratchi

The Scratchi Story

In June 1947 readers of CQ magazine first met the character Scratchi in a column that would continue for some 24 years.

Hashafisti Scratchi was a fictional ham, either from Japan or a Nisei, who wrote letters from "Feenix, Ariz to Deer Hon. Ed:" commenting about or lamenting some feature of "amchoor radio."

Scratchi began in Radio magazine as early as 1940, when he lived near "Sainted Barbers, Caulif." There was a lapse in CQ from 1960 until 1966 when it resumed as a regular column until 1971.

CQ editor, K2MGA, wrote "for many years the name Hashafisti Scratchi has been almost synonymous with confusion and consternation in amateur radio. It seems, too, that whenever the unusual or impossible is happening, Scratchi is there helping it happen."

-de W2MTA

Scratchi's no-code license... (see page 6).

An exhausted deer hunter out in the wilderness stumbled into a hunting camp. "Am I ever glad to see you!" said the deer hunter. "I've been lost for 3 days."

"Don't get too excited," the other hunter replied. "I've been lost for 3 weeks."

After years of listening to her plead, a hunter finally decided to let his wife come hunting with him. He led her into the woods and left her in a blind with instructions on what to do when a deer came within range.

He had no sooner arrived at his own blind when he heard a shot coming from his wife's direction. The first shot was quickly followed by several more shots. He immediately ran back to see what had happened, only to find a man standing in

front of his wife with his hands up shouting, "OK lady, it's your deer! Just let me take the saddle off!"

January 1995

Deer Hon. Ed:

It been menny menny years since I right too you, but I here CQ is having a big berthday partee and I wanting you too no I am still alyve and kicking. I try too stay aktiv on ham bands, two. I liking too listen too repeeters on two meters, but found it much eezier if you hook up radio too the meters. I unnerstand, thow, why they called "repeeters," cause it seem I heer the same old stuff being repeeted over and over.

Now, I heer on repeeters about pocket radio, and pocket bullet- in boreds. Not making much cents too me. I have trubbel putting my keys in my pocket, can't imagine hole bulletin bored.

Ayway, I tried pocket radio. It OK, but werks much better when I take it out of my pocket. I don't see whut's the big deel.

Next thing I heer on repeeter is all about code-free ham license. This sound reel good too me, since I am always catching codes. So I go down too efceecce, and they tell me I have too go too VE team. Can't unnerstand why I have too go too Kanada for USA ham license.

Finally found hams here in Hon. Yewnited States who give license tests. I tell them I want no-code license, but they say I allreddy have code. I say I come back wenn I'm helthee.

Then they say no, I donut unnerstand -- I can't get no-code licensee cauze I allreddy have extra license. I say no, this is the only license I have butt they insisting its extra license. So I ask man behind me in line if he want my extra license so I can get no-code license. He starting to explane that with no-code license, yew can only opurrate when yew donut havv a code.

Butt then the test peepul start yelling if I give man behind me my extra license, they send me to efceecce. I say no need too doo that, since I allreddy went too efceecce and they sent me to Kanada.

I telling yew, ham radio getting very confoosing, suspeshully for old man like mee. So hapee berthday and mebbe I see you on the hair.

Respectively yours, Hashafisit Scratchi
