

But on what basis? In May of 1942, with Ed Handy's departure imminent, the matter was taken up by the ARRL Board of Directors, and again I was bypassed. John Huntoon, W1LVQ, was made acting Communications Manager, I to be his subordinate. John was an assistant secretary, and much admired by almost everybody.

This time my humiliation was spiced with anger, and I decided to seek other employment, one of draft exemption if possible, or else just wait for the draft to catch up to me. My brother Ed, W3NF, was working as a code instructor at a naval school in Bedford, PA. I visited him and was introduced to the school supervisor. The school was set up for the purpose, but it was run by civilians on behalf of the Navy. They needed code instructors and seemed to feel I would fill the bill very nicely, so I made application. They told me the Navy needed CW operators so badly they were opening a school in Hollidaysburg PA. The super said chances were good that I would be draft-deferred, but there was no guarantee; it would be up to my local draft board. I left my application on file and then returned to Hartford. The day after I returned, John Huntoon came to me and explained that the ACM job had been wished on him, that he hadn't sought it, that he wasn't getting any increase in pay, that he was still an assistant secretary and as acting Communications Manager he would only be a figurehead; that I would actually be running what was left of the department. He also said that there would be no more weasel-worded title, that I would be the assistant Communications Manager and he would try to get me a raise. John, then as now, had a winning personality - I felt considerably mollified.

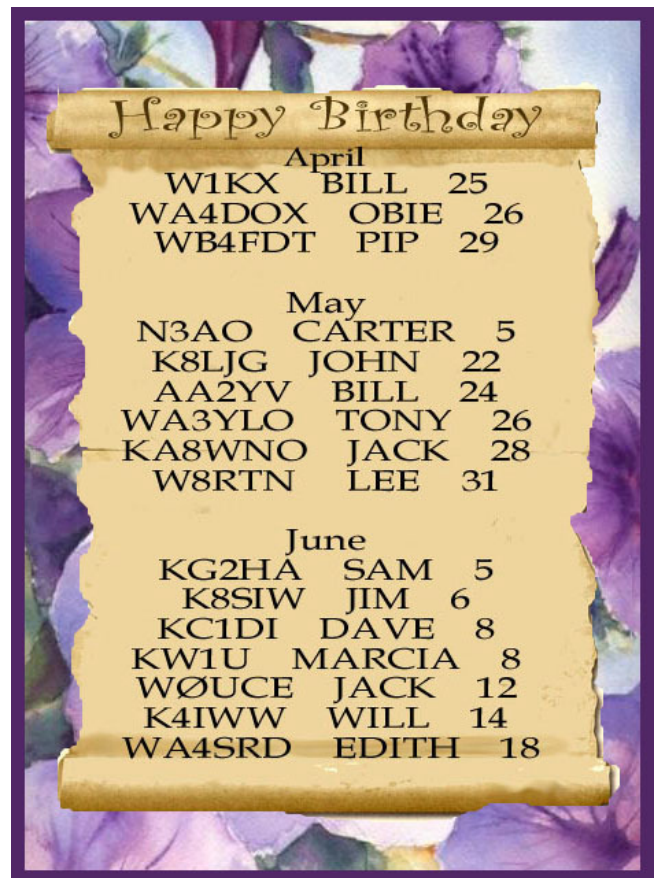

I didn't want to leave ARRL headquarters, or my little house on Highland Street, but I was still seething with anger and humiliation. I told John I had applied for a job to teach code for the Navy and, if accepted, intended taking it. John was as good as his word, about a week later two things happened. John was classified 1-A by his draft board and I received word from Keystone Schools that I was hired and was to report to the new school in Hollidaysburg PA in three weeks. Still no promise of draft deferment. I told John of this development. He told me he was joining the Coast Guard, now part of the Navy, as chief petty officer stationed at Coast Guard training school in Atlantic City. The next day I was summoned into the office of the Great Man himself, Kenneth B. Warner, W1EH, ARRL Secretary and General Manager of the headquarters.

I had spoken with KB only once before, at the 1938 HQ Christmas party in the basement at 38 La

Salle Road. On that occasion he had sought me out, shook my hand, and expressed regret that we hadn't met before, wished me a Merry Christmas and handed me an envelope, then returned to the festivities. In the envelope I found a crisp new ten-dollar bill. It was a custom to give every employee a bonus at the Christmas time, and mine was the minimum. Far from being disappointed, I was delighted. Of course I had seen KB around the office many times but never before had any reason to engage him in conversation. It would not be an exaggeration to say I held him in great awe, and in this instance I approached his sanctum sanctorum in "fear and trembling."

*Coming in Chapter 33 - George settles in to his new position with the ARRL.*

*The following, from the March 2010 issue of The Texan newsletter, reprinted here with permission from Scott, N7NET. Thank you, Scott.*

## **THE DAY AUSTRALIA CALLED**

By Scott Laughlin / n7net, Printed with Permission, Copyright 2008

Dave Phillips, WB7VSN, [at his station above] a native of Southern California, learned American Morse as a youngster. As soon as he learned how to reach the Los Angeles Southern Pacific Train Depot by city bus he was often found there awaiting an opportunity to operate an idle telegraph wire. By the time he'd graduated from high school, he was a station agent.

World War II interrupted his train career where he was General Douglas MacArthur's personal telegrapher. After the war he became a Southern Pacific train dispatcher. After forty years he retired and became an amateur radio operator, as did many others who had spent their lives directing trains hither and yon by means of telegraph. But Marks and Spaces ran deeply in their veins and it wasn't long before they discovered that by using discarded 8-bit computers and modems their telephone lines would emulate Western Union wires. Soon, they were dialing one another and rehashing days of old while using American Morse.

In 1990 Phillips responded to the American Morse Club's urging and formed a Eugene, Oregon Chapter. A host of retired railroad and Western Union telegraphers quickly became charter members, including several women.

When Morse first came into use there were two codes—American and International. The United States chose American because of its many special characters that supported the livestock and grain markets, Wall Street and Baseball, not to mention railroads, Western Union, Associated Press, and the U.S. Postal Telegraph while the rest of the world selected International.

Both systems share many characters. However, C, F, J, L, O, P, Q, R X, Y, Z, all numbers, and all punctuations are different.

Dave, a master of both, never gave much thought to the differences. International was heard through the radio headphones while American was copied over the phone line. And he responded accordingly.

On 2 April 1991 the world celebrated Samuel Finley Breeze Morse's 200th Birthday. In keeping with the spirit of that festivity, Australia's counterpart to America's AT&T, as it was in 1991, provided 24 hours of free landline service to the Alice Springs Radio Club. After contacting everyone they knew on the continent, it seemed fitting to join the celebration at the Hotel Blackstone in Chicago, Illinois. Unfortunately, the only United States phone number they could find belonged to Dave Phillips in Eugene, Oregon.

Dave, having already enjoyed a dozen American Morse contacts that morning, was prepared when the phone rang. But after copying the initial message, he discovered that the fellow on the other end was sending him garbage. The A was okay, but after that he couldn't read enough characters to make one single word. Who was this guy, he wondered? When the fellow turned the wire back, Dave sent an American Morse question mark, asking him to send everything again. But in International Morse the Australian read a DN. Alice Springs, totally confused, sent an International Morse question mark, which in American Morse was a period.

Sometimes, when old landline telegraphers, turned amateur radio operators, become excited they start mixing American and International characters, an incident commonly called "Box Car-ing." Dave, who had been involved in this confusion a time or two, recognized the problem and responded in International Morse.

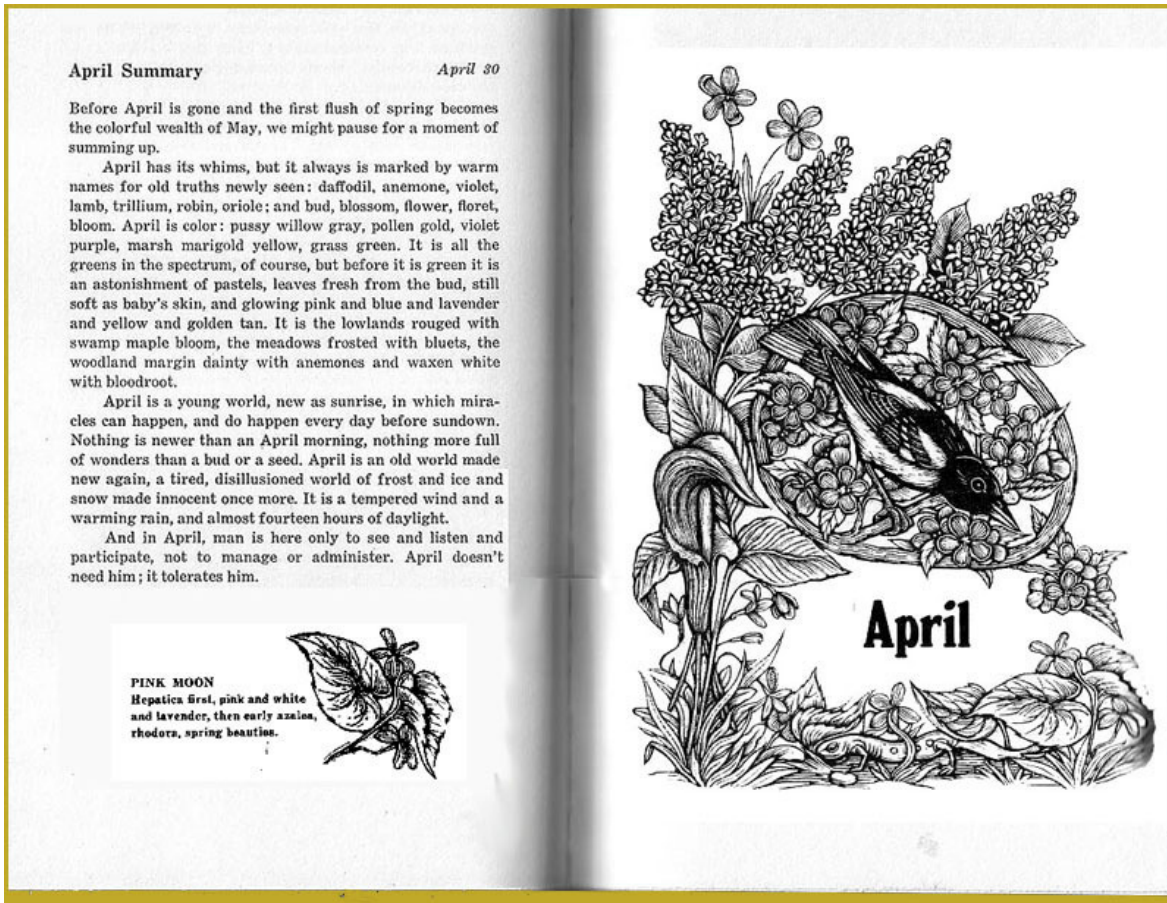

The Hotel Blackstone phone number was sent to Australia and then Morse code laughter was exchanged over the wire, which is the same for both languages. HI HI. HI HI.

Thank you, Scott, for an interesting tale. Floyd, N5EL, upon reading this story, passed along the following: I recommend and encourage any who likes the rhythm of the code learn American Morse and find the pleasure of real rhythm. !!! The hardest part for me was catching onto the make and break of the sounder. It's so easy once you begin

to hear it. Once you learn it use it to get proficient !!! Those of us who love it will keep it going... lets promote !!

.....A good place to do it is on any freq we can find clear and if necessary learn 3 or 4 characters, etc. at a time. Same rules apply and the only rule to be watched, as far as I know, is ID in International Morse, just like we do now. Pass this around to anyone who might be interested working with me on the air. If so, make contact. I'm not a pro but love the stuff as you well know. []
